# Internet Book Management System

Prepared by ANISAH KASO and FATIMA AMIRY

Project Proposal

Assignment # 1

## **Introduction**

The online book management system will maintain information related to internet user and people who interested in reading by using electronic devices. For user interface, C# programming language with Visual studio 2019 will be used. The details of the project are given below:

## **List of Objects**

The project mainly consists of following entities

1. Register (User and Author)
2. Administer
3. Visitor
4. Book types
5. Chapters
6. Feedback
7. Theme
8. Notification
9. My Book Shelf
10. Events

## Detailed functions

### 1. Register

| Function Name  | Description                                    |
|----------------|--|
| Add User       | Add a new user account to database.            |
| Update User    | Update user account information to database.   |
| Add Author     | Add a new author account to database.          |
| Update Author  | Update author account information to database. |
| Search by Name | Search user and author account by name.        |
| Add Book       | Add a new book.                                |
| Update Book    | Update the information of book.                |
| Remove Book    | Remove a canceled book of database.            |
| Log in         | Log in to the system.                          |
| Log out        | Log out of the system.                         |

### 2. Administer

| Function Name  | Description   |
|----------------|---|
| Add Contact    | Add a phone number or email for register and visitor to contact administer. To take the improvements and complements. |
| Announce Event | Announce and update information of Event.   |
| Log in         | Administer log in to the system.  |
| Log out        | Administer log out of the system.   |

### 3. Visitor

| Function Name  | Description  |
|----------------|--|
| Search by Name | Search user and author account by name.                  |
| View Chapter   | Allow visitor to read a few chapter.                     |
| Add Feedback   | Allow the visitor to add feedback after use application. |

#### 4. Book Types

| Function Name  | Description   |
|----------------|---|
| Upload Book    | Upload new books to database.                                     |
| Remove Book    | Upload books from database.                                       |
| Search by Name | Search book by names/author.                                      |
| Add Feedback   | Allow the register and visitor to add feedback after read a book. |

#### 5. Chapters

| Function Name    | Description  |
|------------------|--|
| Update Chapter   | Upload new books to database.  |
| Remove Chapter   | Upload books from database.  |
| Open Chapter     | Open chapter option.   |
| View Chapter     | Allow user to view all the chapter of book.                          |
| Next Chapter     | Next or skip chapter option.   |
| Pervious Chapter | Pervious chapter option.   |
| Close Chapter    | Close chapter option.  |
| Add Feedback     | Allow the register and visitor to add feedback after read a chapter. |

#### 6. Feedback

| Function Name | Description                            |
|---------------|--|
| Add Feedback  | Add a Feedback at the end of chapters. |

#### 7. Theme

| Function Name | Description                                      |
|---------------|--|
| Display Mode  | Allow user to choose dark and bright mode theme. |

## 8. Notification

| Function Name       | Description                         |
|---------------------|-------------------------------------|
| Show Notification   | Show notifications.                 |
| Delete Notification | Remove/Delete notifications option. |
| Mute Notification   | Mute notifications option.          |

## 9. My Book shelf

| Function Name        | Description                              |
|----------------------|--|
| Add favorite book    | Add a favorite book on My Book shelf.    |
| Remove favorite book | Remove a favorite book on My Book shelf. |

## 10. Events

| Function Name | Description   |
|---------------|---|
| Add Event     | Allow Administer announce event and TOP10 of most readed book per week. |
| Remove Event  | Remove a canceled event.  |
